

ADDENDUM TO SOCIAL SCIENCES LESSON PLANS

NOTE TO TEACHERS:

1. That they should insert the appropriate Learning Outcomes in the column of integration within and across where they are not stated. This is especially the case with Grade 6 integration across with **Arts & Culture where the integrating LO is not stated**
2. In the column for barriers to Learning, these columns are left blank because barriers differ from environment to environment and from teacher to teacher. **Therefore teachers should concern themselves and pay particular attention to the barriers they identify in that lesson and not with the assumed barriers.**
3. Where a Learning Outcome is not written in full, teachers should consult the Policy document to confirm the correct wording. **A learning Outcome being dealt with in any Lesson Plan should always be written in full.**
4. As much as possible teachers should give learners a variety of questions when assessing. These should always be linked to assessment standards.
5. These Lesson Plans only serve as a guide, teachers are free to adapt them as long as they relate to the Work Schedule and talk to the Learning Outcomes and Assessment Standards.
