

The below listed points are intended to assist learner's performance in Agricultural Sciences. It is important that learners master the following:

- They must be organized, relaxed and self-disciplined
- Reading and understanding instructions
- Agricultural terminology/concepts
- Comprehending case studies
- Plotting of graphs
- Interpretations of graphs, tables, charts, etc
- Short calculations
- All higher order questions according to Bloom's taxonomy
- Data-response questions
- All topics in the workschedule are to be dealt with
- Ensure that learners know topics for paper 1 and paper 2 accordingly
